REP Series

Environmentally - Sealed Rectangular Plastic Connectors

Optimised for
use in rail and
embedded
applications

Smiths Interconnectors' REP Series of multi-pole, sealed, and plastic connectors, provides a quick and secure connection of embedded equipment across a wide range of applications, such as sensors, brakes, lighting, air conditioning and communications found within industrial, rail, test and measurement, automotive, public works and defence.

The REP Series is available with the proven Hypertac® hyperboloid contact technology which ensures excellent reliability under shock and vibration, and allows up to 20,000 mating cycles and high current rating up to 18 A. REP connectors are also available in the EasyREP version, using MR screw machined contacts and allowing up to 500 mating cycles.

REP and EasyREP connectors are available in three layouts, with 2, 6, and 12 ways. Both versions are available with crimp termination contacts, for cable harness applications, and with straight or bent termination contacts for PCB mount applications. A shunt accessory is available for both versions, enabling derivation inside the connector for transmission of information to different locations.

Only one contact can be used for cross section cables 0.5 mm² to 2.5 mm² (20-13 AWG) according to NFF 63-808 and EN 50306 standards. No specific tool is required, with consequent reduction of supply chain, maintenance and cabling costs. Furthermore, for easy mounting, the connector includes polarized guides and provides several configurations: cable to cable, clips, front and back panel mount.

REP and EasyREP connectors are available for delivery as a complete, tested pre-cabled solution according to customers' specifications.

Features

Compact, flexible design

- Standard insulators available in 2, 6 and 12-way configurations
- Crimp, straight and bent termination options

Easy mounting and maintenance

- No specific tooling required for mounting
- One contact required for cross-section cables 0.50-2.50 mm² (20-13 AWG) to NFF 63-808 and EN 50-306 standards

High quality, integrated features

- Overmoulded silicone grommet and interfacial seal delivers IP66 and IP67 protection
- Vibration resistance to EN 61-373, Category 2 standards
- Compliance to fire and smoke standards
- Improved polarised guides
- Three coding devices: cable-to-cable, clip locking, and front and back panel mount

Contact technologies

- Low insertion/extraction forces
- Minimal contact resistance
- Stable signal integrity

Benefits

Optimised for rail and embedded applications

- Space and weight savings
- Qualified to ensure high degree of safety
- Able to accept a large panel of cables with standard offering

Fast and reliable connection

- Ensure failure-free performance in extremely demanding environments
- Immunity to fretting caused by mating/unmating and shock and vibration

Reduced cost of ownership

- Minimised supply chain, inventory and maintenance costs
- Lowered cabling costs

Superior performance

- Hypertac® and MR contacts ensure higher current carrying capacity than contacts of the same size

Complete, tested pre-cabled solutions available to customer's exact specifications

Available Contact Technologies

Features and Benefits

Hypertac® Hyperboloid - Original HC

- **Long contact life**
Industry-leading mating cycles (up to 20,000) provide low cost of ownership
- **Superior signal integrity**
No discontinuity when measured down to 2ns
- **Low insertion/extraction forces**
Ergonomic mating without cost and size of mate assist hardware
- **Lower contact resistance**
Low power consumption / lower voltage drop across connector
- **Higher current ratings**
Smaller contacts needed to carry power for reduced size and weight
- **Immunity to shock and vibration**
Reliability under harsh environmental conditions
- **360° contact wipe**
Self-cleaning contacts assure uninterrupted connection
- **Cable section**
From 0.5 to 2.5 mm² cross section (20-13 AWG)
- **RoHS compliance**

Screw-machined contact - MR

- **Rail standard contact life**
Mechanical life >500 cycles
- **Tested signal integrity**
No contact interruption >50 ns
- **Flexible design**
The inner clip and the socket body are manufactured and plated separately
- **Reliable and cost effective**
The production of machined specific contact bodies allows for high volume
- **Low insertion/extraction forces**
Ergonomic mating without cost and size of mate assist hardware
- **Low contact resistance**
Low power consumption / lower voltage drop across connector
- **Higher current ratings**
Small contacts needed to carry power for reduced size and weight
- **Cable section**
From 0.75 to 2.5 mm² cross section (18-13 AWG)
- **RoHS compliance**

Compact Signal and Ethernet PCB Connectors

- Compact, high-speed, and reliable solution for PCB to PCB and floating mounting rack and panel applications
- Hyperboloid contact technology for signal and high speed quadrate 100 Ohm contacts
- Compliance with the main European Railway standards (EN45545-2, NF F61030, EN50155:2017, STM-S-001ind.D & more), with MIL-C-28748 and MIL-STD-202-301 standards and EIA/IEC standards for contact resistance and environmental testing

Modular and Mini-Modular Connectors

- Mixed signal, power, coaxial, fiber optic and pneumatic modules
- Provides up to 200 amp power
- Cable to chassis and rack & panel; Plastic backshell with strain relief and half turn quick disconnect jackscrew
- Float mountable for blind mating
- Configurations compliant to EN45545 standards
- Hyperboloid contact technology

Rugged M12 Connectors

- Compact IP67 metal shell
- 360° EMI shielding
- Hyperboloid contact technology
- Compliant with rail fire and smoke standards
- Straight and right angle 90° rotatable backshell
- Compatible with most commonly used rail cables
